

News In Brief

We have been busy with labelling and packaging changes for a couple of months, and our product labels now have barcodes and tamper-evident seals, as well as a snazzy new look!

New Products for the New Year

We have a new range of chilli seeds that we are able to offer to our trade customers for the first time. We are also adding a range of catering-size tubs for most of our sauces and preserves.

New Chilli Seed Packets

For 2008, we are able to offer a range of chilli seed packets to our trade customers. If you would like to see a sample of the packaging, please call or email. The seeds are packed in sealed foil packs, and then presented in a standard-sized seed packet with full details on the reverse side. We have selected a dozen of our favourite chillies for this range.

Catering Tubs - 1.2ltr size.

For cafes, deli counters, restaurants and sandwich bars, we can now offer a bulk-buy tub. Our Chilli Jam, Chilli Jelly and Chilli Chutney are great in rolls and sandwiches, and our Sweet Thai sauce and Smokey Chipotle sauces are fantastic in wraps. For customers wanting a hot sauce to use in recipes or to decant as a table sauce, we also have Hot Habanero and Jalapeno sauces available in the same tubs. The tubs have a tamper-evident seal and a carry-handle, and should be kept refrigerated once opened.

New Labelling and Tamper-Evident seals.

We have now completed the lengthy process of updating our labels to include barcodes and, we hope, improve the impact of the labels on the shelf. The jars also have 'safety-pop' lids and the bottles have tear-off seals or tamper rings on the caps.
